

Central search is a federated search engine for searching across your library's electronic resources from one simple interface. Central Search allows you to search the online catalog and a number of online databases simultaneously. Also, it enables you to search for material on your topic across many of our online resources in one go.

Quick Search

The screenshot shows the 'Quick Search' section of the library website. It features three main search boxes: 'Site Search', 'Quick Article Search (via Central Search)', and 'Catalog Search'. The 'Quick Article Search' box has a 'Keyword' dropdown, a text input field, and a 'GO' button. The 'Catalog Search' box has a 'Keyword' dropdown, a text input field, an 'Entire Collection' dropdown, and 'GO' and 'Advanced Search' buttons. A red 'Ask a Librarian' button is on the left. Callout boxes provide instructions: 'choose a search index.' points to the 'Quick Article Search' box; 'Enter your search terms to this box.' points to the text input field in the 'Quick Article Search' box; and 'Quick search is limited to 14 multidisciplinary databases. Click to extend your search to all databases' points to the 'Choose a different set of databases' link below the 'Quick Article Search' box.

Advanced Search by Database

The screenshot shows the 'Advanced Search by Database' interface. It includes a warning: 'Please don't use Turkish characters (ç, ı, ğ, ö, ü) in your search terms.' Below this are tabs for 'Basic Search' and 'Advanced Search', and a link for 'Search by subject | Search by database'. The search area contains three rows of 'And' dropdown menus, each followed by a 'Keyword' dropdown and a text input field. A 'Year' dropdown is also present. A 'Search' button is at the bottom. A list of databases is shown below, each with a checkbox: 'Select All', 'ABI Inform Global', 'Academic Search Complete', 'ACM', 'American Chemical Society', 'American Institute of Physics', 'American Physical Society Journals (Citations)', 'Animal Behavior', 'Blackwell - Synergy (HSS Journals only)', 'EML Journals', and 'Book Index with Reviews'. Callout boxes provide instructions: 'In these fields, you may use Boolean operators (and, or, not) for multiple search terms.' points to the 'And' dropdowns; 'Check "Select All" box, to search all databases' points to the 'Select All' checkbox; 'Alternatively, you can select one or more databases as needed.' points to the other database checkboxes; and 'The year box gives you the added option to narrow your searches by year.' points to the 'Year' dropdown.

Advanced Search by Subject

Check "Select All" box, to search all subjects.

Alternatively, you can select one or more subjects as needed.

VIEWING & WORKING WITH RECORDS

You can sort results by different criteria

Check "Full Text" box to display full text articles only.

If you get too many results, you can limit them by date, journals, authors and source in this field.

To view an article, click on blue, underlined hyperlink.
